

Meeting Week 2:

Notetaker: Mayte Steeghs

No Chairperson: Everyone was present.

- We went over logistical details of how the lab meetings will be set up.
- **We need to set a chairperson and notetaker as a group**, they don't need to rotate.
 - Notes and Agenda needs to be uploaded every week before the next meeting.
- Code contribution should be equal among group members, each person should develop at least two microservices.

Deadline 1: 2nd December for the Draft Architecture

Final Deadline Assignment 1: Architecture 16 December

- Two draft microservices are available on brightspace. This gives us an indication on how they should communicate.
- **TODO: Read the scenario and finalise requirements. Formulate these into issues on Gitlab**
- **Setup CI/CD pipeline**
- Question: do we need to contribute equally every single week? Answer: yes, but it doesn't have to be perfectly equal every week.

We have decided as a group

Chairperson: Ivo

Notetaker: Anton
